WARNING

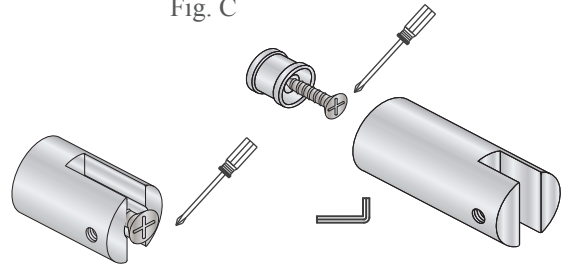

- This product is best installed according to manufacturer's instructions and be done so by qualified installer.
- All installation must be done so with proper hardware and protective gears to ensure safety.
- Always install on a sound substrate/surface.

Projecting Supports

Note: The projecting support can be installed vertically or horizontally. The supports can be mounted using #8 screw or M6 stud.

For #8 screw, insert the screw through the anchor or ATCM20251/ATCM20252 (Fig. C) and secure on surface.

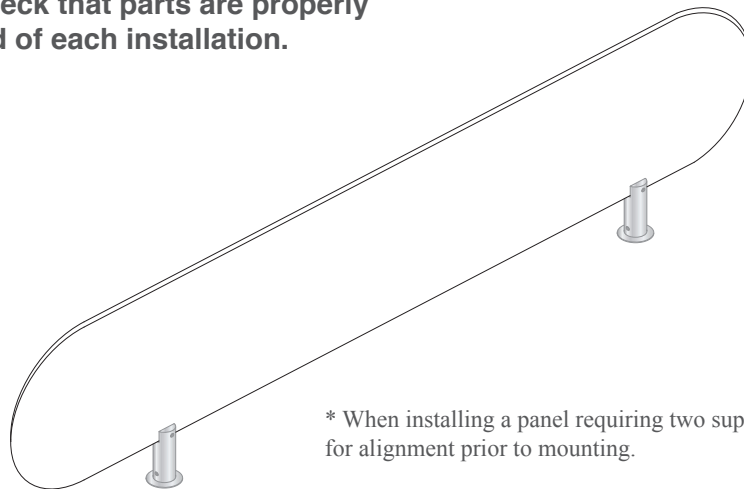

Fig. C

For M6 stud, screw the anchor or the support directly onto the stud. (See Fig. A and Fig. B).

Slide panel directly through the panel slot. Tighten with set screw.

It is important to check that parts are properly tightened at the end of each installation.

* When installing a panel requiring two supports, use a guide for alignment prior to mounting.
